To Whom It May Concern,

My name is Jason Kohler, I am an Arborist with NWTL Inc. based here in Sandy. I recently inspected trees at 37380 American St., Sandy because of safety concerns the residents at this location communicated. The residents have witnessed dramatic and concerning movement of the trees during wind events this season. It is my opinion that the roots of this Douglas Fir tree and the immediately adjacent Western Red Cedar, have been impacted by heavy equipment during previous construction and that these trees should be removed to mitigate risk of damage to the property and its residents. There are no other trees in the vicinity, and winds from multiple directions hit these trees at this location with full force, creating unnecessary risk of the trees falling onto the house or onto a neighboring house.

Thank you for your attention to this matter,

Jason Kohler
