

FUTURE

RAIN

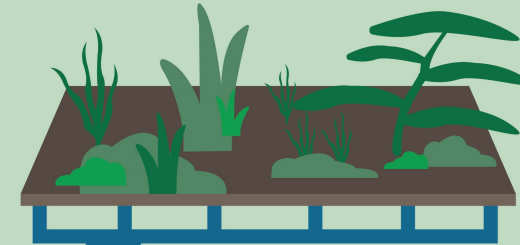

Rainwater and groundwater *intrusion has been significantly reduced* with the improved collection system.

WASTEWATER

LOCAL NURSERY

Discharge May - Oct

REPAIRED COLLECTION SYSTEM

TREATMENT PLANT UPGRADED

DISCHARGE OPTIONS

A portion of the treated water that cannot be directly discharged into Tickle Creek or used as nursery recycled water would be injected to recharge our groundwater using a new polisher.

POLISHER

A new polisher uses super filters to allow treated water to be further refined and injected back into the groundwater supply. →

TICKLE CREEK

Discharge Nov - Apr

+1,000'

GROUNDWATER

SANDY CLEAN WATERS
