City News

One of the simplest things you can do to help reduce your utility bill is to find and repair any leaks in your household plumbing system - no matter how small. A dripping faucet or toilet leak as small as 1/10<sup>th</sup> of a gallon per minute can waste over 4,000 gallons (over 5 CCF) of water in a month. With the recent increase in sewer rates this is even more important.

Starting March 1<sup>st</sup> The Regional Water Provider's Consortium will be providing free indoor leak detection kits to the first 1,000 customers that sign up.

Visit <https://www.regionalh2o.wishpondpages.com/falw> after February 29<sup>th</sup> to reserve your kit.

Later in March is Fix-a-Leak Week from the 16<sup>th</sup> to the 22<sup>nd</sup> – Check the City's website, Facebook page and Twitter feed during this week for additional water-saving tips and advice.

**Toilet leaks waste more than water.**
