Response: *All buildings are existing and the only applicable standard is the location of the Jiffy Lube building to the proposed side property line. As shown on the submitted plan, the Jiffy Lube building will be located 4.94 feet from the proposed west side property line in compliance with this standard.*

B. *Special Setbacks—Side or Rear Yard Abutting a More Restrictive District.*

1. Property abutting a more restrictive zoning district shall have the same yard setback as required by the abutting district. An additional ten feet shall be added for each ten foot increment in building height over 35 feet;
2. Measurement of the height transition area shall be made between the foundation of the proposed building and the property line of the abutting district;
3. When the proposed structure has different sections that have different heights, the height transition area shall be measured for each vertical surface as if it were to be freestanding. The building then must be located on the site so that no section is closer to the abutting property line than it would be if the section was free-standing;
4. The required buffering and screening and utilities may be located within the height transition area. Off-street parking, accessory structures and incidental

development may be located within the height transition area but not any areas designated as buffering and screening area.

Response: As shown on the sketch to the right, the subject property abuts a R-2 zoned property along its northern border and a R-3 zoned property along a portion of its eastern border. The portion of the property included in Parcel 1 to contain the Jiffy Lube is completely surrounded by C-2 zoned property.
